Subject: Notice in Accordance with TSCA Section 8(e): Results of a toxicity study with an experimental fungicidal formulation containing three active ingredients in an Acute Immobilization Test with *Daphnia magna* (non-GLP preliminary test)

Dear Section 8(e) Coordinator:

[REDACTED] is submitting results of an acute toxicity study with an experimental fungicidal formulation containing three active ingredients on *Daphnia magna* (non-GLP preliminary test), conducted by [REDACTED].

Active Ingredients:

1. [REDACTED]
2. [REDACTED]
3. [REDACTED]

The range finder test was conducted in a static system over 48 hours according to the OECD Guideline for Testing of Chemicals, No. 202 (2004): *Daphnia* sp., Acute Immobilisation Test.

The following nominal concentrations were tested: 0 (control), 0.025, 0.044, 0.08, 0.14 and 0.25 mg/L based on formulation.

The following effect concentration was obtained based on nominal concentration:

In the acute immobilization test with *Daphnia magna* (non-GLP preliminary), the EC₅₀/48 h is approximately >0.14 and <0.25 mg/L.

Explanation:

EC_x is the (effective) concentration of the test item (non-GLP preliminary test), causing X% immobilization of *Daphnia magna*.
